Hobart-Marlette Backcountry  
Trail Report  
July 1, 2003

All trails within Lake Tahoe Nevada State Park Backcountry are open. Two snowdrifts still persist between Hobart/Laxalt Junction and Snow Valley Peak on the Tahoe Rim Trail. Streams are running strong and water is available 1/4 mile North of the Marlette Peak Campground on the Tahoe Rim Trail. Filters must be used. North Canyon and Marlette Peak Campgrounds are open with no permits required. Both are primitive camping sites assessable by hiking or mountain biking. Restrooms are available at each camping location; water availability is from stream sources, using filtration only. Please pack out your garbage and practice "Leave No Trace" camping activities.
